

# US P3 AND THE EMERGING SOCIAL INFRASTRUCTURE SECTOR HALF DAY SEMINAR FOLLOWED BY COCKTAIL RECEPTION

Thursday May 2, 2013

Hogan Lovells, 875 Third Avenue New York, NY 10022

Until recently, the US P3 market has been dominated by transport projects. However, an increasing need for investment in social infrastructure and a growing understanding of the benefits of P3 has increased interest in widening the scope of the model.

The demand is there, the private sector expertise is in place and investors are warming to a new wave of projects – so can social infrastructure become the next big P3 market?
